# Overview

## Patient Flow

# Prior authorization

Barostim requires prior authorization based on the patient medical necessity criteria.

CVRx Patient Access Support (CPAS) provides case-by-case support for providers who perform Barostim implantation procedures.

CPAS offers assistance for the following services:

1. Coding and coverage information
2. Eligibility and benefit verification
3. Prior authorization
4. Pre-determination or certification
5. Pre and post service appeals

To enroll in the CVRx Patient Access Support (CPAS) service or submit a request online:

[www.cvrx.com/healthcare-professionals/reimbursement](http://www.cvrx.com/healthcare-professionals/reimbursement)

**Contact the CVRx helpline for copies of the forms or with any questions:**

Email: [reimbursement@cvrx.com](mailto:reimbursement@cvrx.com)

Phone: 763-416-2344

Fax: 855-710-7053

## System implant - Commonly used diagnosis codes\*

| ICD-10-CM | Descriptor   |
|-----------|--|
| I50.2     | Systolic (Congestive) Heart Failure  |
| I50.20    | Unspecified Systolic (Congestive) Heart Failure  |
| I50.21    | Acute Systolic (Congestive) Heart Failure  |
| I50.22    | Chronic Systolic (Congestive) Heart Failure  |
| I50.23    | Acute on Chronic Systolic (Congestive) Heart Failure                                     |
| I50.3     | Diastolic (Congestive) Heart Failure   |
| I50.30    | Unspecified Diastolic (Congestive) Heart Failure   |
| I50.31    | Acute Diastolic (Congestive) Heart Failure   |
| I50.32    | Chronic Diastolic (Congestive) Heart Failure   |
| I50.33    | Acute on Chronic Diastolic (Congestive) Heart Failure                                    |
| I50.4     | Combined Systolic (Congestive) and Diastolic (Congestive) Heart Failure                  |
| I50.40    | Unspecified Combined Systolic (Congestive) and Diastolic (Congestive) Heart Failure      |
| I50.41    | Acute Combined Systolic (Congestive) and Diastolic (Congestive) Heart Failure            |
| I50.42    | Chronic Combined Systolic (Congestive) and Diastolic (Congestive) Heart Failure          |
| I50.43    | Acute on Chronic Combined Systolic (Congestive) and Diastolic (Congestive) Heart Failure |

\*Not a complete list

# Physician Coding

# Patient assessment

## Barostim indications<sup>1</sup>

- NYHA III or NYHA II (with recent NYHA III) despite treatment with GDMT\* (medications and devices)
- LVEF ≤ 35%
- NT-proBNP < 1600 pg/mL

Barostim delivers Baroreflex Activation Therapy for improvement of patients' heart failure functional status, six-minute hall walk, and quality of life.

## Contraindications

- Been assessed to have bilateral carotid bifurcations located above the level of the mandible
- Baroreflex failure or autonomic neuropathy
- Uncontrolled, symptomatic cardiac bradyarrhythmias
- Carotid atherosclerosis that is determined by ultrasound or angiographic evaluation greater than 50%
- Ulcerative plaques in the carotid artery as determined by ultrasound or angiographic evaluation
- Known allergy to silicone or titanium

NOTE: Boston Scientific's S-ICD and Medtronic's EV-ICD contraindicates patients with unipolar pacing devices (e.g.: Barostim, which uses unipolar stimulation)

\*Guideline Directed medical therapy (GDMT) according to 2022 AHA/ACC/ESC guidelines

## Possible coding for Barostim evaluations

### CPT® 93306 – Transthoracic Echocardiogram

Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, with spectral Doppler echocardiography, and with color flow Doppler echocardiography

### CPT® 93308 – Transthoracic Echocardiogram

Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, follow-up or limited study

### CPT® 93880 – Carotid Artery Duplex Scan

Duplex scan of extracranial arteries; complete bilateral study

### CPT® 93882 – Carotid Artery Duplex Scan

Duplex scan of extracranial arteries; unilateral or limited study

### CPT® 83880 – NT-ProBNP

N-Terminal pro B-Type Natriuretic Peptide

### CPT® 94618 – Six-Minute Hall Walk Test

Pulmonary stress testing (eg, Six-Minute Hall Walk Test), including measurement of heart rate, oximetry, and oxygen titration, when performed

## System implant - Physician coding

### CPT® 64654 – System Implant

Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming

## Generator replacement - Physician coding

### CPT® 64656 – Generator Replacement

Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only

## Programming and interrogation - Physician coding

### CPT® 93145 – Interrogation device evaluation without programming

Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); without programming,

### CPT® 93146 – Interrogation device evaluation with programming

Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); with programming, including optimization of tolerated therapeutic level setting.

## Follow-up - Physician coding

Possible **primary diagnosis** codes for interrogation and programming. Possible **secondary diagnosis** codes for interrogation and programming are Heart Failure diagnosis codes (see page 6)

| ICD-10-CM     | Descriptor   |
|---------------|--|
| <b>Z45.09</b> | Encounter for adjustment and management of other cardiac device    |
| <b>Z45.89</b> | Encounter for adjustment and management of other implanted devices |

Follow up visits or services may be billed independently from the Barostim device interrogation (with or without programming) and evaluation visits.

### Physician coding: follow-up visit CPT® codes

#### CPT® 99211 – Follow-up Evaluation and Management

Office or other outpatient visit for the evaluation and management of an established patient that may not require the presence of a physician or other qualified health care professional.

#### CPT® 99212 – Follow-up Evaluation and Management

Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and straightforward medical decision making. When using total time on the date of the encounter for code selection, 10 minutes must be met or exceeded.

#### CPT® 99213 – Follow-up Evaluation and Management

Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using total time on the date of the encounter for code selection, 20 minutes must be met or exceeded.

#### CPT® 99214 – Follow-up Evaluation and Management

Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using total time on the date of the encounter for code selection, 30 minutes must be met or exceeded.

#### CPT® 99215 – Follow-up Evaluation and Management

Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and high level of medical decision making. When using total time on the date of the encounter for code selection, 40 minutes must be met or exceeded.

# Outpatient Coding

## System implant - outpatient hospital coding

### CPT® 64654 – System Implant

Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming.

| HCPCS code   | Descriptor   |
|--------------|--|
| <b>C1825</b> | Generator, neurostimulator (implantable), non-rechargeable with carotid sinus baroreceptor stimulation lead(s) |

## System implant - Chargemaster entry

For an initial “**system implant**” (full device – Generator and Lead at the same time) use the following product numbers:

- **100069-202**, Barostim Neo2 Neurostimulator System IPG Model CSL Comb Kit

This procedure is always billed using **C1825** - Generator, neurostimulator (implantable), non-rechargeable with carotid sinus baroreceptor stimulation lead(s).

Any (single part below) **replacements** are billed using **C1767** (Generator) and **C1778** (Lead) – see crosswalk below and more on page 13 under Replacement

100065-202, Barostim NEO2 Model 2104 (**IPG** only)

100063-212, Barostim Neo CSL Kit Model 1036 SH (**lead** only)

| Procedure   | Descriptor   | CPT® code <sup>3</sup> | HCPCS code <sup>4</sup> | Item #  |
|---|--|------------------------|-------------------------|---|
| <b>Initial Barostim System Implant (Kit) De novo implant only</b> | Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming | <b>64654</b>           | <b>C1825</b>            | 100069-202, Barostim Neo2 Neurostimulator System IPG Model CSL Comb Kit |
| <b>Battery replacement only (Barostim)</b>                        | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only  | <b>64656</b>           | <b>C1767</b>            | 100065-202, Barostim NEO2 Model 2104 <b>IPG</b> (only)                  |
| <b>Lead replacement only</b>                                      | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; lead only   | <b>64655</b>           | <b>C1778</b>            | 100063-212, Barostim Neo CSL Kit Model 1036 SH ( <b>lead</b> only)      |

## Generator replacement - outpatient hospital coding

### CPT® 64656 – Generator Replacement

Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only

J1- Hospital Part B services paid through a Comprehensive APC (C-APC). Comprehensive APCs (C-APCs) were established for certain payment groups (e.g., device intensive) whereby Medicare only reimburses a single C-APC on a date of service.

### HCPCS level II device codes

The following HCPCS Level II codes should be used for cost reporting purposes when reporting Barostim generator replacement. In general, C-codes are used for billing Medicare and L-codes are used for billing private payers, although some private payers may also accept C-codes.

| HCPCS code                          | Descriptor  |
|-------------------------------------|---|
| <b>Battery and lead replacement</b> |   |
| C1767                               | Generator, neurostimulator (implantable), non-rechargeable                                      |
| C1778                               | Lead, neurostimulator (implantable)   |
| L8686                               | Implantable neurostimulator pulse generator, single array, non-rechargeable, includes extension |
| L8680                               | Implantable neurostimulator electrode, each   |

## Hospital Sample Claim – Initial Implantation

|                    |      |                                 |                             |           |  |       |         |                              |                    |         |                    |                    |    |               |          |                 |                |                                 |    |                  |                                 |    |                        |                |    |                |  |    |  |  |  |  |  |  |  |   |     |  |                |

# ASC Coding

## System implant - ASC coding

| CPT® code    | Descriptor  | Status indicator | APC <sup>6</sup> |
|--------------|---|------------------|------------------|
| <b>64654</b> | Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming. | J8               | 1580             |

J8 - Device-intensive procedure; paid at adjusted rate.

| HCPCS code <sup>4</sup> | Descriptor   |
|-------------------------|--|
| <b>C1825</b>            | Generator, neurostimulator (implantable), non-rechargeable with carotid sinus baroreceptor stimulation lead(s) |

## Generator replacement - ASC coding

### CPT® 64656 – Generator Replacement

Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only

### HCPCS level II device codes

The following HCPCS Level II codes should be used for cost reporting purposes when reporting Barostim generator replacement. In general, C-codes are used for billing Medicare and L-codes are used for billing private payers, although some private payers may also accept C-codes.

| HCPCS code                          | Descriptor  |
|-------------------------------------|---|
| <b>Battery and lead replacement</b> |   |
| <b>C1767</b>                        | Generator, neurostimulator (implantable), non-rechargeable                                      |
| <b>C1778</b>                        | Lead, neurostimulator (implantable)   |
| <b>L8686</b>                        | Implantable neurostimulator pulse generator, single array, non-rechargeable, includes extension |
| <b>L8680</b>                        | Implantable neurostimulator electrode, each   |

# Inpatient Coding

## System implant - inpatient hospital coding

| ICD-10-PCS procedure code    | Descriptor   | Typical MS-DRG assignment   |
|------------------------------|--|---|
| <b>0JH60MZ</b><br><u>AND</u> | Insertion of stimulator generator into chest subcutaneous tissue and fascia, open approach | 276   |
| <b>03HK3MZ</b><br><u>OR</u>  | Insertion of stimulator lead into right internal carotid artery, percutaneous approach     | Cardiac Defibrillator Implant with MCC or Carotid Sinus Neurostimulator |
| <b>03HL3MZ</b>               | Insertion of stimulator lead into left internal carotid artery, percutaneous approach      |   |

## Physician coding appendix

| CPT® code | Descriptor   | Work RVU | Total Facility PE RVU |
|-----------|--|----------|-----------------------|
| 64654     | Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming | 11       | 2.96                  |
| 64655     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; lead only   | 11.3     | 5.4                   |
| 64656     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only  | 8.01     | 2.8                   |
| 64657     | Removal of baroreflex activation therapy (BAT) modulation system; total system, including lead and pulse generator   | 12.13    | 3.76                  |
| 64658     | Removal of baroreflex activation therapy (BAT) modulation system; lead only  | 8.95     | 3.03                  |
| 64659     | Removal of baroreflex activation therapy (BAT) modulation system; pulse generator only   | 8.23     | 2.9                   |

| CPT® code | Descriptor  | Work RVU | Total Non-Facility PE RVU |
|-----------|---|----------|---------------------------|
| 93145     | Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); without programming   | 0.65     | 1.64                      |
| 93146     | Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); with programming, including optimization of tolerated therapeutic level setting | 0.9      | 2.48                      |

## Ambulatory Surgery Center appendix

| CPT® code | Descriptor   | Status Indicator | APC  |
|-----------|--|------------------|------|
| 64654     | Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming | J8               | 1580 |
| 64655     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; lead only   | J8               | 5461 |
| 64656     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only  | J8               | 5465 |
| 64657     | Removal of baroreflex activation therapy (BAT) modulation system; total system, including lead and pulse generator   | G2               | 5432 |
| 64658     | Removal of baroreflex activation therapy (BAT) modulation system; lead only  | G2               | 5461 |
| 64659     | Removal of baroreflex activation therapy (BAT) modulation system; pulse generator only   | G2               | 5461 |

## Hospital coding appendix

| CPT® code | Descriptor  | Status indicator | APC  |
|-----------|---|------------------|------|
| 64654     | Initial open implantation of baroreflex activation therapy (BAT) modulation system, including lead placement onto the carotid sinus, lead tunnelling, connection to a pulse generator placed in a distant subcutaneous pocket (ie, total system), and intraoperative interrogation and programming  | S                | 1580 |
| 64655     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; lead only  | J1               | 5461 |
| 64656     | Revision or replacement of baroreflex activation therapy (BAT) modulation system, with intraoperative interrogation and programming; pulse generator only   | J1               | 5465 |
| 64657     | Removal of baroreflex activation therapy (BAT) modulation system; total system, including lead and pulse generator  | Q2               | 5432 |
| 64658     | Removal of baroreflex activation therapy (BAT) modulation system; lead only   | J1               | 5461 |
| 64659     | Removal of baroreflex activation therapy (BAT) modulation system; pulse generator only  | J1               | 5461 |
| 93145     | Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); without programming   | S                | 5721 |
| 93146     | Interrogation device evaluation (in person), carotid sinus baroreflex activation therapy (BAT) modulation system including telemetric iterative communication with the implantable device to monitor device diagnostics and programmed therapy values, with interpretation and report (eg, battery status, lead impedance, pulse amplitude, pulse width, therapy frequency, pathway mode, burst mode, therapy start/stop times each day); with programming, including optimization of tolerated therapeutic level setting | S                | 5721 |

Hospital Outpatient Status Indicator:

J1- Hospital Part B services paid through a Comprehensive APC (C-APC). Comprehensive APCs (C-APCs) were established for certain payment groups (e.g., device intensive) whereby Medicare only reimburses a single C-APC on a date of service.

Q2- Paid under OPPS; Addendum B displays APC assignments when services are separately payable.

S- Procedure or Service, Not Discounted When Multiple.

# Reimbursement

Reimbursement information provided by CVRx is gathered from 3rd party sources and is presented for illustrative purposes only. This information does not constitute legal or reimbursement advice. CVRx makes no representation or warranty regarding this information or its completeness, accuracy, timeliness or applicability with any particular patient. CVRx specifically disclaims liability or responsibility for the results or consequences of any actions taken in reliance on information in this document. CVRx encourages providers to submit accurate and appropriate claims for services. Laws, regulations and payer policies concerning reimbursement are complex and change frequently. Providers are responsible for making appropriate decisions related to coding and reimbursement submissions. Accordingly, CVRx recommends that customers consult with their payers, reimbursement specialists and/or legal counsel regarding coding, coverage and reimbursement matters.

**CAUTION:** Federal law restricts this device to sale by or on the order of a physician. See Instructions for Use 900133-001 for a complete instruction for use and a description of indications, contraindications, warnings, precautions and adverse events.

Barostim is indicated for patients who are NYHA Class III or Class II (who had a recent history of Class III) despite treatment with guideline-directed medical therapies (medications and devices), have a left ventricular ejection fraction of  $\leq 35\%$ , and a NT-proBNP  $<1600$  pg/mL. Barostim delivers Baroreflex Activation Therapy for improvement of patients' heart failure functional status, six-minute hall walk, and quality of life.

Patients are contraindicated if they have been assessed to have bilateral carotid bifurcations located above the level of the mandible, baroreflex failure or autonomic neuropathy, uncontrolled symptomatic cardiac bradyarrhythmias, carotid atherosclerosis that is determined by ultrasound or angiographic evaluation greater than 50%, ulcerative plaques in the carotid artery as determined by ultrasound or angiographic evaluation, known allergy to silicone or titanium.

Warnings include: only trained physicians may use this system, prescribing physicians should be experienced in the diagnosis and treatment of heart failure and should be familiar with the use of this system, monitor blood pressure and heart rate during Carotid Sinus Lead placement and when adjusting stimulation parameters intra-operatively, post-implantation, program the system to avoid the following: heart rate falls below 50 beats per minute (BPM), or systolic pressure falls below 90 mmHg, or diastolic blood pressure falls below 50 mmHg, or problematic adjacent tissue stimulation is noted, or undesirable interaction indicated by monitoring of any other implanted electrical device (see "Device Interaction Testing" in Section 10), or any other potentially hazardous patient responses are observed. Improper system implantation could result in serious injury or death. Do not use diathermy therapy including shortwave, microwave, or therapeutic ultrasound diathermy on patients implanted with the system. Patients should be counseled to stay at least 15 cm (6 inches) away from devices with strong electrical or magnetic fields such as strong magnets, loudspeaker magnets, Electronic Article Surveillance (EAS) system tag deactivators, arc welders, induction furnaces, and other similar electrical or electromechanical devices. This would include not placing items such as earphones in close proximity to the implanted pulse generator. The IPG may affect the operation of other implanted devices such as cardiac defibrillators, pacemakers, or neurological stimulation systems. For patients who currently have an implanted electrical medical device, physicians must verify compatibility with the implanted device during implantation of the system. Contralateral implant of the Barostim NEO IPG may help to reduce potential interactions. Interactions are more likely in devices that contain a sensing function, such as an implantable cardiac defibrillator or pacemaker. If an interaction is observed, the Barostim NEO IPG should be programmed to reduced therapy output settings in order to eliminate the interaction. If necessary, change settings in the other implant only if the changes are not expected to negatively impact its ability to perform its prescribed therapy. During the implant procedure, if device interactions cannot be eliminated the Barostim NEO System should not be implanted.

Precautions include: the system should be implanted and programmed carefully to avoid stimulation of tissues near the electrode or in the area of the IPG pocket. Such extraneous stimulation could involve the following: the regional nerves, causing laryngeal irritation, difficulty swallowing, or dyspnea, the cervical musculature, causing intermittent contraction, skeletal muscles, causing intermittent contraction around the IPG pocket. Proper sterile technique during implantation should be practiced and aggressive pre-operative antibiotics are recommended. Infections related to any implanted device are difficult to treat and may necessitate device explantation.

It is anticipated that subjects will be exposed to operative and post-operative risks similar to related surgical procedures involving the neck and/or a pacemaker implant. These risks and potential risks of chronic device based baroreflex activation may include, but are not limited to: stroke, transient ischemic attack (TIA), systemic embolization, surgical or anesthetic complications, infection, wound complications, arterial damage, pain, nerve damage/stimulation, hypotension, hypertensive crisis, respiratory, exacerbation of heart failure, cardiac arrhythmias, tissue erosion/IPG migration, injury to baroreceptors, fibrosis, allergic reaction, general injury to user or patient, need for reoperation, secondary operative procedure, and death. Patients implanted with the system may receive Magnetic Resonance Imaging (MRI) only when all MR Conditional safety parameters are met as listed in the instructions for use.
